

IF SPAIN WERE A VILLAGE WITH 100 PEOPLE

Speakers	Text
	If Spain were a village...
	with 100 people living there
	There would be 49 men
	and 51 women
	They would live in 37 homes altogether
	15 of the 100 villagers would be
	under 14 years old
	and 17 of them would be
	over 65 years old
	12 would be foreign
	Which countries would they come from?
	Well, mostly
	Romania
	Morocco
	Ecuador
	and the United Kingdom
	46 people would be married
	44 would be single
	6 would be widowed
	4 would be separated or divorced
	Women would have their first baby
	when they were 30 years old
	We would live until we were 82 years old!
	74 would feel healthy
	60 would wear glasses
	or contact lenses
	50 would never have somoked
	54 would be overweight
	and would be a bit tubby
	13 would be allergic to something
	17 people would go to school
	17 people would go to school
	3 would be at university
	40 would have a job
	33 of them would have a boss
	and the other 7 would work for themselves
	30 of them would be happy in their job
	Guess what!
	Women would be paid
	a little bit less than men
	In other words.
	if our dads were paid 100...
	our mums would be paid 78
	45 would go to work or school

	by car or motorbike
	30 would walk
	22 by public transport:
	bus, underground, tram, train...
	1 by bicycle
	2 would not leave the house
	112 tourists would visit us
	Just imagine!
	More than all the villagers put together
	The countries where most of them
	would come from would be
	the United Kingdom
	Germany
	and France
	There would be 7 companies in the village
	There would also be 53 pigs
	and 12 cows.
	Every villager would get through
	an average of 149 litres of water per day
	How interesting!
	How do we know all this?
	Because of statistics!
	Statistics help us find out about ourselves
	and give us a better understanding
	of the way we live!
